

Interview with DORIS VUKELJA, Restaurant manager at Projekt 9

What inspired you to join Healthy Meal?

Our main motivation was empathy and the desire to create something new, something different, a small thing for us but significant for the users of this program.

What kind of impact do you hope to achieve through this initiative?

We want to try to make a change and provide a restaurant-like experience to those who cannot afford it.

How do you define the menus of the meals, and what was the feedback you received?

We will prepare healthy and nutritious meals, mostly served as a spoon meal, such as stews and meat dishes in sauce, fish and similar food. The beneficiaries will receive a menu especially prepared for this initiative with different meals and will have the possibility to choose what they want to eat.

Are your ordinary customers also involved and supporting the initiative?

Yes, we have prepared a donation box. By donating, visitors can increase the number of meals for the beneficiaries of this initiative.

Which are the main challenges you have encountered?

Initiatives like this always require more time, but we hope that other restaurants will see a positive contribution in this initiative and join in. We plan to make people realize how they can always help with their contribution, just as we do with meal donations.
